## Who Are We?

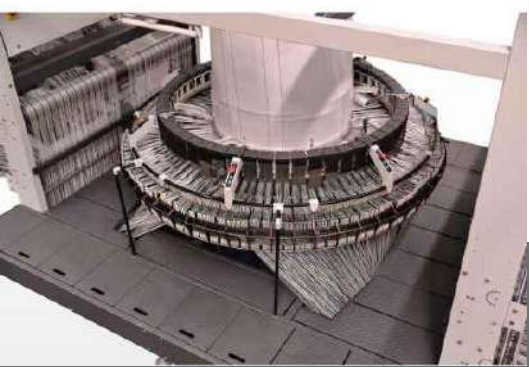

Splenzo Polyfab is a company that provides one-stop supplies and solutions for agro and industrial goods packaging. We design and develop a wide variety of heavy-duty PP/HDPE bags and BOPP bags while conforming to international standards of quality and durability at the most competitive prices.

A brand name matters most in the maze of manufacturers. Having started our journey in 2019, situated in Gujarat, India, we have come a long way. Throughout our journey, we have never failed to offer durable, reliable, and cost-excellent packaging solutions to different industries.

## Infrastructure and Machinery

Our production facility is equipped with the latest machinery and technologies capable of producing a wide range of bags for various applications. We use advanced extrusion and weaving technology to produce strong, durable, and lightweight bags that are perfect for any application.

Our machinery includes Tape Extrusion Plant, Circular Weaving Looms, Extrusion Coating Plant, Printing Machine, Bag Cutting & Stitching Machine, and more.

## Mission

Dedication to delivering the highest quality of products and customer services.

## Vision

To become the most preferred packaging company with customer-centric values.

## Quality

Our polypropylene (PP)/high-density polyethylene (HDPE) bags and biaxially-oriented polypropylene (BOPP) bags are highly durable and ideal for outdoor use. They are also lightweight, making them easy to transport and store. End-to-end integration enables us to exercise supreme control over the quality, innovative designs, on-time deliveries, and excellent customer care services.

Our bags are available in a range of sizes and colors, making them suitable for a variety of applications. We also offer custom printing services, allowing you to create the perfect bag for your needs.

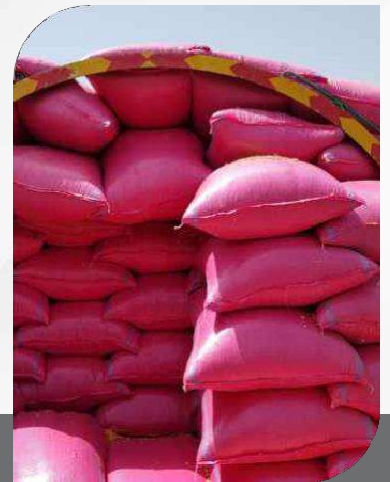

DURABLE

REUSABLE

ECO-FRIENDLY
